Exhibition space  
(in squaremeters)

# Specialized congresses.

→ **FIMM** is a high-level specialized platform aimed at strengthening the country's **metalworking** industry.

Designed to promote technical analysis, professional development, and collaboration among companies and industry specialists, FIMM brings together manufacturers, suppliers, engineers, entrepreneurs, and industrial leaders in a strategic **environment focused** on innovation, technology, and the generation of **business opportunities**.

# Benefits of participation.

## International Networking.

The event **enables interaction** with entrepreneurs, associations, and institutional representatives, creating valuable connections for future business and collaborations.

## Generation of business partnerships.

The trade fair is an ideal platform to identify strategic partners who strengthen the value chain, expanding **distribution channels** and operations.

## Brand positioning and visibility.

The trade fair gives exhibitors the opportunity to present their products and services to a highly specialized audience, strengthening their presence in the industrial market.

# The **future** of metalworking is showcased here.

**FIMM** is the specialized platform that **drives the development** and competitiveness of the metalworking sector in the country. It has established itself as a strategic meeting point for innovation, networking, and the generation of **business opportunities**.

It brings together in one space solutions in machinery, tools, and technology applied to manufacturing, aimed at optimizing production processes, industrial automation, and **digital transformation**.

  
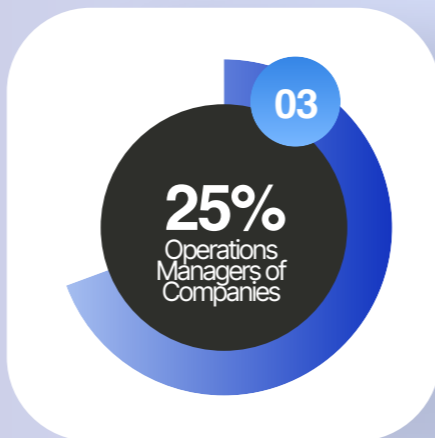

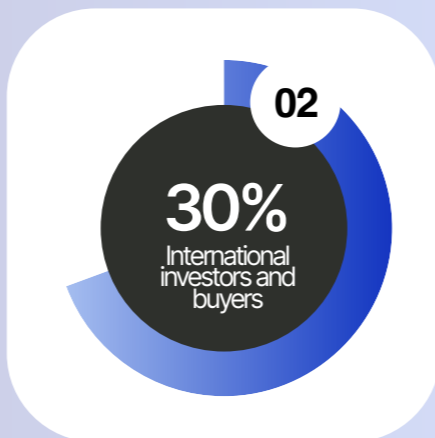

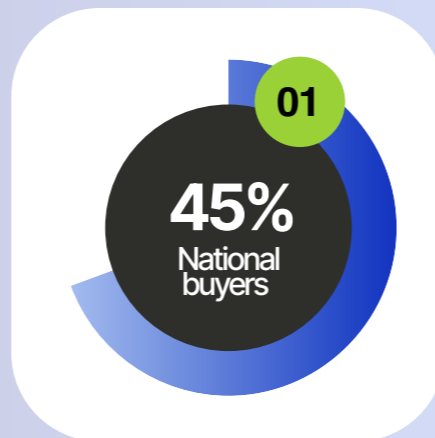

**FIMM PERÚ**  
FERIA INTERNACIONAL DE METALMECÁNICA

→ **FIMM** drives the country's productive strength.

# Visitor profile.

**FIMM** primarily brings together decision-makers and strategic stakeholders linked to the metalworking and **manufacturing industry**.

Attendees include general managers, plant managers, production managers, engineers, technical supervisors, maintenance managers, as well as industrial buyers and executives from **supplier companies** in the sector.

# Who exhibits?

- CNC and conventional machine tools:** Machining centers, lathes, milling machines, grinding machines, shearing machines, press brakes, rolling machines, boring machines, among others.
- Electrical discharge machines:** Wire cutting, plasma, and laser cutting equipment, cutting tables, and accessories.
- Equipment and technology for industrial processes:** Welding equipment, collaborative robots, industrial tools and abrasives, foundry solutions, industrial maintenance, coolants, and CNC additives.
- Tools and consumables:** High-speed steel and carbide cutting tools, inserts, and specialized consumables.
- Metalworking services:** Design, manufacturing, and assembly of parts and components (sprockets, gears, shafts, rollers, among others), as well as general industrial maintenance.
- Industrial paints and coatings.**

# Driving the metalworking industry.
